

Senior Environmental Engineer

Founded in 1957, Braun Intertec has built a comprehensive scope of services in engineering and environmental consulting, materials and analytical laboratories, and testing services. We help clients with site selection and panning, design, construction, operations and property management. We are seeking an innovative professional with a strong customer focus at our corporate offices in Minneapolis, MN.

Responsibilities include:

- Consulting with internal and external clients about environmental site characterization, remediation and soil and groundwater contamination issues.
- Consulting with clients about soil vapor assessment and mitigation issues.
- Environmental consulting with application to commercial, industrial and energy sectors.
- Collaborating on facility design projects and construction inspection/documentation projects.
- Collaborate with other staff on hydrogeologic evaluation, stormwater design and management, erosion control and land reclamation projects.
- Working with and mentoring junior engineers and scientists.

We seek a take-charge professional with strong attention to detail and the ability to work in a team environment. Qualifications include:

- Bachelor's degree in Engineering
- Professional Engineer registration or ability to obtain professional registration
- 8+ years related experience or equivalent combination of education and experience
- Strong written and oral communication skills.
- Must have good organization skills
- PC proficiency
- Strong client service management skills.
- Must have a valid driver's license.

We are highly regarded as a leader in the engineering and environmental consulting field and offer a competitive salary and excellent benefits.
